

How to change the Language of the GUI in Win XP?

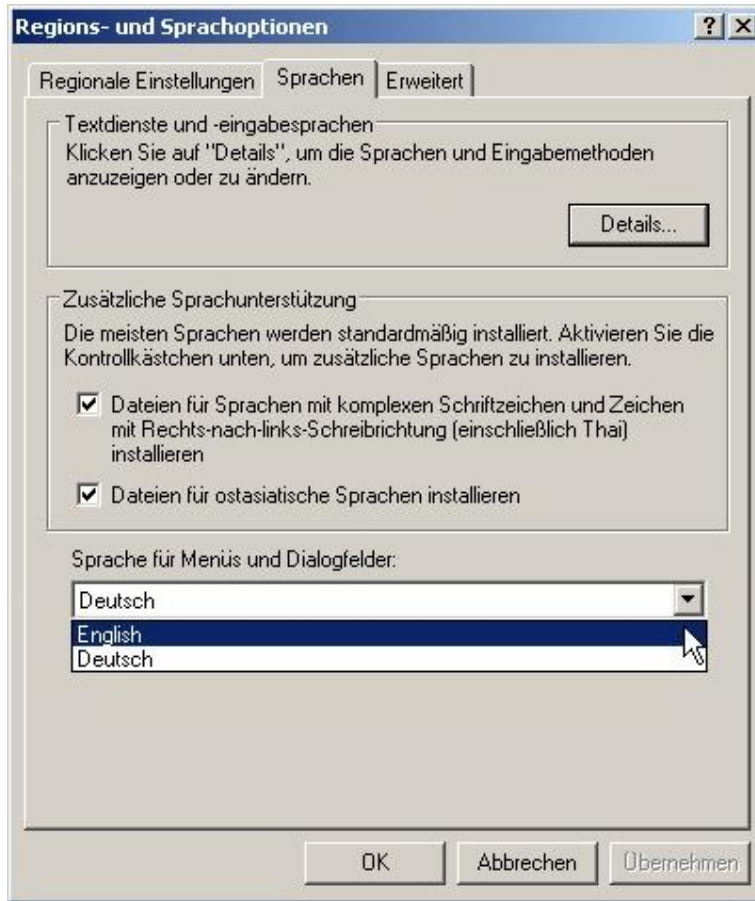

1. Begin by clicking *Start -> Einstellungen -> Systemsteuerung*

2. After that the *Systemsteuerung Window* should appear. Search for *Regions- und Sprachoptionen* and click it twice.

3. Now, in this window, choose the tab *Sprachen* and then from the *Drop Down List* below the language you want. To confirm, press the *OK Button*.

4. Now, you have to *Log Off and Log On* your account. Only then the changes will take effect.
